

EXERCISE-3

INCLUDING CONSTRAINTS

Name: Vedhasree S

Register Number: 240701580

Department: CSE

1. Add a table-level PRIMARY KEY constraint to the EMP table on the ID column. The constraint should be named at creation. Name the constraint my_emp_id_pk.

The screenshot displays the APEX SQL Workshop interface. At the top, the navigation bar includes the APEX logo and links to App Builder, SQL Workshop (selected), Team Development, and Gallery. Below the navigation bar, the 'SQL Commands' section is active, showing a list of commands. The first command is 'ALTER TABLE EMP', the second is 'ADD CONSTRAINT my_emp_id_pk', and the third is 'PRIMARY KEY (ID);'. The 'Results' tab is selected at the bottom, showing the message 'Table altered.' and the execution time '0.08 seconds'.

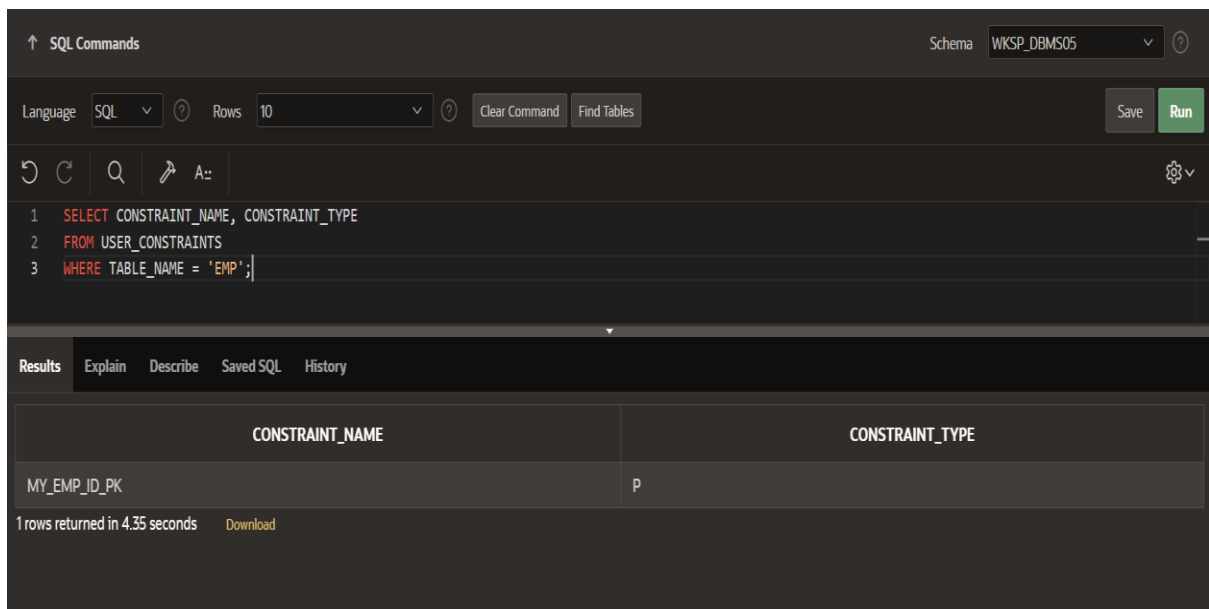

```
1 ALTER TABLE EMP
2 ADD CONSTRAINT my_emp_id_pk
3 PRIMARY KEY (ID);
```

Results Explain Describe Saved SQL History

Table altered.

0.08 seconds

To confirm the constraint was added:

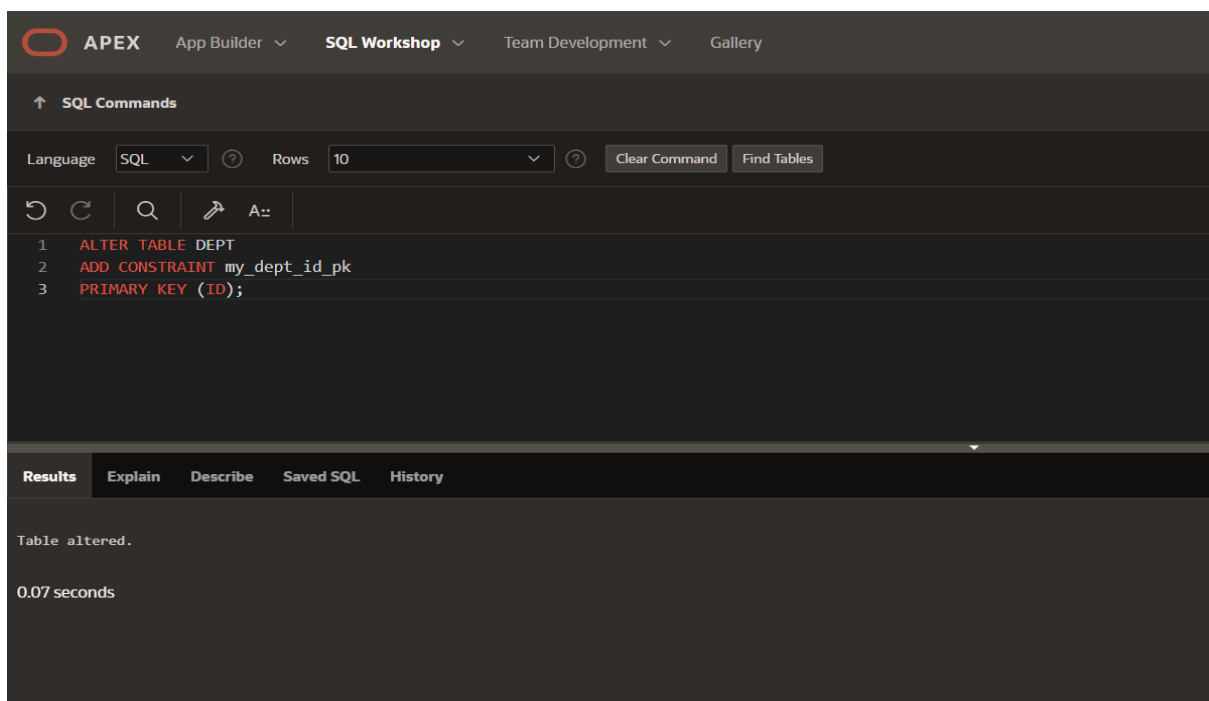

The screenshot shows the SQL Workshop interface with the following details:

- Schema:** WKSP_DBMS05
- Language:** SQL
- Rows:** 10
- SQL Command:**

```
1 SELECT CONSTRAINT_NAME, CONSTRAINT_TYPE
2 FROM USER_CONSTRAINTS
3 WHERE TABLE_NAME = 'EMP';
```
- Results:** A table with two columns: CONSTRAINT_NAME and CONSTRAINT_TYPE. The first row shows MY_EMP_ID_PK and P.
- Footer:** 1 rows returned in 4.35 seconds

CONSTRAINT_NAME	CONSTRAINT_TYPE
MY_EMP_ID_PK	P

2. Create a PRIMARY KEY constraint to the DEPT table using the ID column. The constraint should be named at creation. Name the constraint my_dept_id_pk.

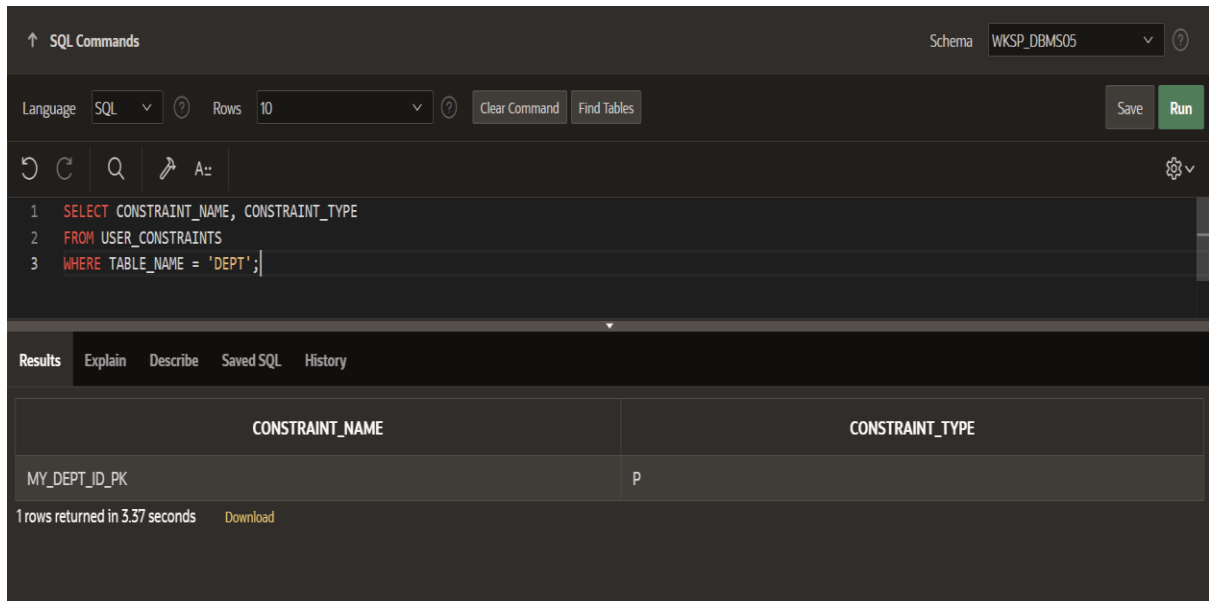

The screenshot shows the SQL Workshop interface with the following details:

- Schema:** WKSP_DBMS05
- Language:** SQL
- Rows:** 10
- SQL Command:**

```
1 ALTER TABLE DEPT
2 ADD CONSTRAINT my_dept_id_pk
3 PRIMARY KEY (ID);
```
- Results:** Table altered.
- Footer:** 0.07 seconds

To confirm the constraint was added:

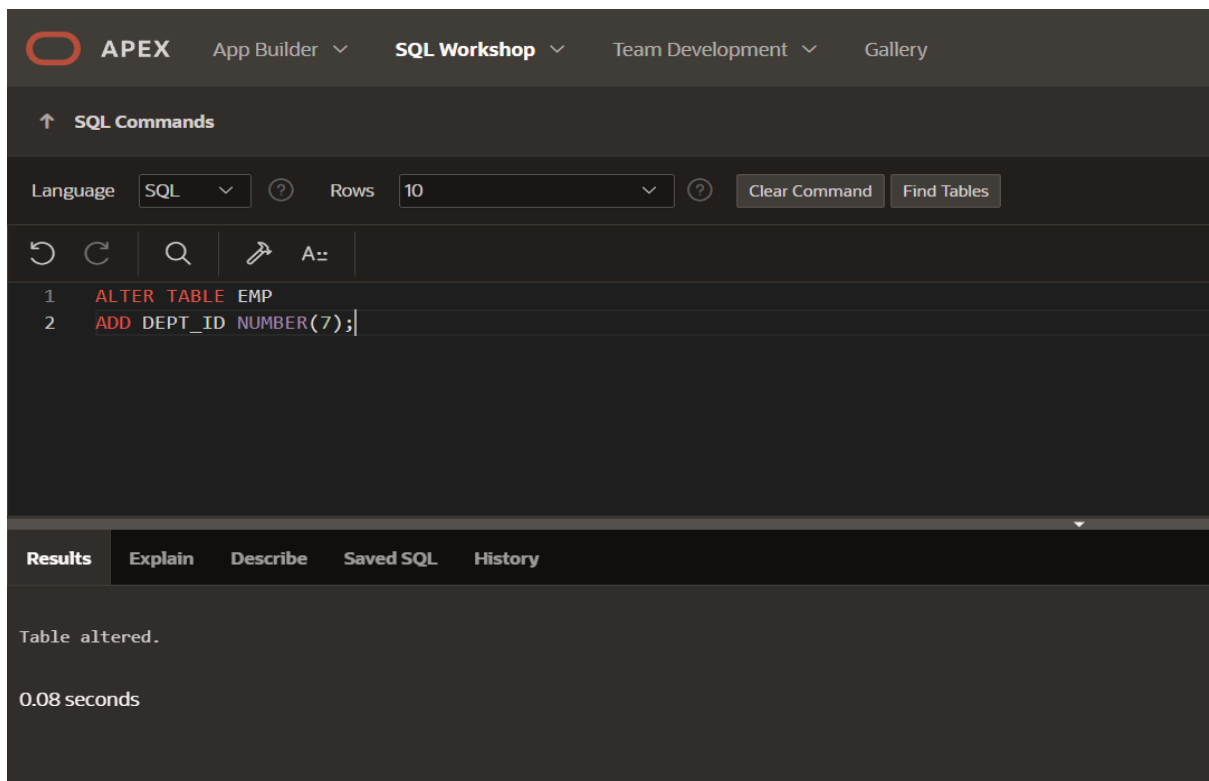

The screenshot shows the SQL Workshop interface with the following details:

- Schema:** WKSP_DBMS05
- Language:** SQL
- Rows:** 10
- SQL Commands:**

```
1 SELECT CONSTRAINT_NAME, CONSTRAINT_TYPE
2 FROM USER_CONSTRAINTS
3 WHERE TABLE_NAME = 'DEPT';
```
- Results:**

CONSTRAINT_NAME	CONSTRAINT_TYPE
MY_DEPT_ID_PK	P
- Footer:** 1 rows returned in 3.37 seconds

3. Add a column DEPT_ID to the EMP table. Add a foreign key reference on the EMP table that ensures that the employee is not assigned to non-existent department. Name the constraint my_emp_dept_id_fk.

The screenshot shows the SQL Workshop interface with the following details:

- Navigation:** APEX, App Builder, SQL Workshop, Team Development, Gallery
- SQL Commands:**

```
1 ALTER TABLE EMP
2 ADD DEPT_ID NUMBER(7);
```
- Results:**

Table altered.

0.08 seconds

Describe

Saved SQL

History

CONSTRAINT_NAME	CONSTRAINT_TYPE	TABLE_NAME	R_CONSTRAINT_NAME
MY_EMP_DEPT_ID_FK	R	EMP	MY_DEPT_ID_PK
MY_EMP_ID_PK	P	EMP	-

2 rows returned in 2.88 seconds Download

4. Modify the EMP table. Add a COMMISSION column of NUMBER data type, precision 2, scale 2. Add a constraint to the commission column that ensures that a commission value is greater than zero.

The screenshot shows the APEX SQL Workshop interface. The top navigation bar includes the APEX logo and links to App Builder, SQL Workshop (selected), Team Development, and Gallery. Below the navigation bar, the 'SQL Commands' section is active. It features a 'Language' dropdown set to 'SQL', a 'Rows' dropdown set to '10', and buttons for 'Clear Command' and 'Find Tables'. The SQL command editor contains two lines of code: `1 ALTER TABLE EMP` and `2 ADD COMMISSION NUMBER(2,2);`. Below the editor, the 'Results' tab is selected, displaying the message 'Table altered.' and the execution time '0.08 seconds'.

The screenshot shows the APEX SQL Workshop interface with the same top navigation bar. In the 'SQL Commands' section, the 'Language' dropdown is 'SQL' and 'Rows' is '10'. The SQL command editor now contains three lines of code: `1 ALTER TABLE EMP`, `2 ADD CONSTRAINT emp_commission_chk`, and `3 CHECK (COMMISSION > 0);`. The 'Results' tab is selected, showing 'Table altered.' and an execution time of '0.06 seconds'.
